À moi +  
Dear Arthur,

Thank you for participating in the CyberSecurity Challenge 2021. We had tremendous fun! We hope you did too.

At TrustBuilder, we believe that identity will be the cornerstone of cybersecurity in the years to come. Innovative companies building an ecosystem around their web or mobile application can only succeed when they actually know (in a secure and unambiguous manner), what the identity of the end user is. That is exactly what we can offer to our customers, using our cloud-based TrustBuilder.io platform.

If you are interested in a career at a scale-up company on the forefront of cybersecurity, don't hesitate to have a look at our [open positions](#) or our [Young Graduate program](#). We are looking for young, bright and motivated people, preferably with a good sense of humor 🤪, to join our growing team. Can't find an open position that suits your career plan? Just drop us an e-mail at [careers@trustbuilder.com](mailto:careers@trustbuilder.com), so we can see if you can join our team in another function.

We wish you all the best in the remaining months of your education, and we hope to hear from you. I look forward to building the future of cybersecurity with you.

Best regards,

Kris
